ABET NEWS 2010

The must of the year: trendy décor chosen by Paola Navone

The colours and shades chosen by Paola Navone for the collection NEWS 2010 are 13; furthermore there are other five trendy finishes matched to 42 Nero and 410 bianco ghiaccio.

The must of the year are the natural colours of woods and stones, in addition to dull colours. Holz, Microline and Grainwood are the textures which define the wood series. For the three shades more similar to wood, the finish is almost impalpable and the tactile sensation is really delicate. The irregular micro-engravings suggest the typical features of wood. A tight texture, enhanced by a grey background, characterizes the microline finish. The Grainwood finish finds its utmost expression in a chromatic alternation of light and dark shades. In the laminates chosen for the stone series, the climb finish evokes the dull, natural aspect of a rock face. Black Carbon is the only laminate with an extra gloss finish LUC-2. In the series of dull colours there are only black and white nuances, for the trendy selection of laminates available in five different finishes. The Zodia 3 finish gives a warm and velvety aspect to the laminate.
